

Ali Almanea

Senior Full Stack Engineer | Frontend Architecture, Backend Systems & AI | React, Vue, Next.js | Node.js, NestJS, Django

📍 Istanbul, Turkey ✉ ali.rashad23@gmail.com ☎ 0552 297 73 95 🔗 ali-almanea 🐙 zaabta

Summary

Senior Full Stack Engineer with 4+ years of experience building high-performance web platforms, scalable SaaS products, and AI-driven applications. Specialized in frontend architecture, backend systems, microservices, and cloud-native solutions using React, Vue.js, Next.js, Node.js, TypeScript, NestJS, Django, PostgreSQL, Redis, Docker, Kubernetes, and AWS. Experienced in designing distributed systems, developing production-grade AI solutions, and leading end-to-end feature delivery across the entire stack. Passionate about system design, developer experience, and building reliable, scalable products with measurable business value.

Key Achievements

- Architected and deployed a RAG-based AI assistant, automating complex CRM workflows and candidate screening
- Improved API performance by up to ~30% through backend optimization and caching strategies
- Reduced infrastructure costs by ~20–25% via system redesign and optimization
- Supported production systems with 10,000+ active users
- Processed 100,000+ automated messages via WhatsApp and Facebook integrations
- Improved development speed by ~40% using reusable design systems
- Reduced system latency by ~35–40% using Redis caching and queue-based architecture

Experience

Senior Full Stack Engineer , Voltlines – Istanbul, Turkey	Aug 2023 – Feb 2026
• Owned end-to-end delivery of enterprise features across frontend and backend systems • Designed unified Core API architecture reducing duplicated business logic • Built reusable Vue.js design system improving UI delivery speed by ~40% • Improved scalability and stability under high-traffic conditions • Developed SEO-optimized applications using Next.js, React, and GSAP • Worked with AWS, Docker, Kubernetes, and Helm in production environments	
Senior Full Stack Developer , ClouZon – Istanbul, Turkey	Mar 2023 – Mar 2024
• Built scalable CRM systems using Node.js, NestJS, PostgreSQL, and Redis • Designed microservices and event-driven architecture • Developed AI-powered CRM assistant using RAG-based architecture • Improved performance by ~40% using caching and queue systems • Built full-stack applications using Next.js and tRPC • Integrated WhatsApp and Facebook APIs for automated communication • Developed backend automation using cron jobs and workers • Contributed to CI/CD pipelines and production deployments	
Instructor & Full Stack Developer , YouThink Academy powered by WozU – Istanbul, Turkey	Aug 2022 – Sept 2023
• Mentored 60+ students in React and Node.js development • Delivered project-based training and technical code reviews	
Mobile Developer , Wide Scope – Istanbul, Turkey	Jan 2022 – June 2022
• Developed cross-platform mobile applications using React Native • Integrated REST APIs and Redux state management	

Education

Nisantasi University, MSc in Artificial Intelligence

2023 – present

- Focused on advanced AI concepts, including machine learning, neural networks, and data-driven solutions
- Developed expertise in AI applications, algorithms, and practical implementation for real-world problems

Siirt University, BSc in Computer Engineering

2017 – 2021

- Completed a 4-year Computer Engineering program with strong skills in programming, algorithms, and software development
- Contributed to an AI library and other open-source projects

YouThink Academy powered by WozU, Bootcamp in Full-stack Software Development

Sept 2021 – Apr 2022

- Completed full-stack bootcamp, proficient in HTML, CSS, JavaScript, React, Node.js, and more
- Built web interfaces, REST APIs, and managed databases using Git for real-world projects

Projects

RAG Document Question Answering System

Built a Retrieval-Augmented Generation (RAG) system for intelligent document question answering using vector search and LLMs.

- Implemented document ingestion and chunking pipeline
- Integrated vector database for semantic search
- Connected LLM for contextual and accurate responses
- Optimized retrieval accuracy for large document datasets

HR AI Agent

AI-powered HR assistant designed to automate candidate screening and employee support workflows.

- Built automated CV screening using LLM-based extraction
- Developed conversational HR assistant for employee queries
- Reduced manual HR workload through intelligent automation
- Structured resume parsing and data normalization

VibeTune

AI-powered music recommendation platform that generates personalized playlists using image analysis and external music APIs.

- Implemented mood detection using image analysis
- Integrated external music APIs for dynamic recommendations
- Designed recommendation logic based on contextual signals
- Built scalable backend for real-time suggestions

Skills

Backend: Node.js, TypeScript, NestJS, Microservices, PostgreSQL, Redis, System Design

Frontend: React, Next.js, Vue.js, Nuxt.js, React Native, Tailwind CSS, GSAP

DevOps & Cloud: Docker, Kubernetes, AWS, CI/CD, Helm

AI & Data: RAG, AI Agents, LLM Applications, Prompt Engineering, OpenAI API

Languages

Arabic: Native

English: Professional Working Proficiency

Turkish: Professional Working Proficiency
